Mr. Abbattista is the Principal in Charge of Operations for OLA Consulting Engineers. In this role, he oversees the administration and financial aspects of the firm as well as providing leadership to the firm's IT Services Group and guiding the marketing and business development efforts of the firm.

Prior to this role, Mr. Abbattista was the Principal in Charge of the Mechanical Discipline as well as the Principal in Charge of Marketing and Business Development. Since joining the firm in 1992, Mr. Abbattista has been a mechanical engineer and project manager for commercial, retail, historic restoration, and institutional projects. For five years, Mr. Abbattista was responsible for the firm's Dallas Office operations including marketing and business development, client relationship management, project management, and technical quality assurance. During his tenure in Dallas, Mr. Abbattista developed the office from a staff of one to a staff of thirteen. In 2000, Mr. Abbattista was made a Principal in the firm and relocated back to the New York Office.

One of the firm's leaders with respect to energy efficient buildings and sustainable design, Mr. Abbattista has published articles and given seminars on a variety of issues related to HVAC systems, sustainable design, and energy efficiency in buildings. He is a frequent speaker for state and local AIA chapters and has taught review courses for the licensing exam for Professional Engineers in the mechanical discipline.
